

PRODUCT SHOWCASE—*Footlogix introduces new size shoe/foot spray*

Knowledge is prime when deciding which products to use at our pedicure stations. What about what we recommend to our clients. It is just as important to know what we are recommending as it is with what we are using.

Using Footlogix foot deodorant spray prior to your client consultation in your pedicure service, offers a pleasant fragrance which otherwise could be very embarrassing.

Using Footlogix shoe deodorant spray on your clients shoes after the service, not only brings client awareness to the product but teaches them the importance of getting rid of the bacteria in their shoes.

Our shoe and foot deodorant spray has a cool menthol fragrance.

We use tea tree, an anti-bacterial agent to kill the surface bacteria.

- Use our foot spray in gym bags and lockers
- Use our shoe spray on flip flops, sandals, leather shoes and golf shoes
- Is there an odor in your car you can't get rid of? Try our foot spray
- Use our shoe spray when shopping for new shoes

CJ'S 2011
KNOWLEDGE CORNER

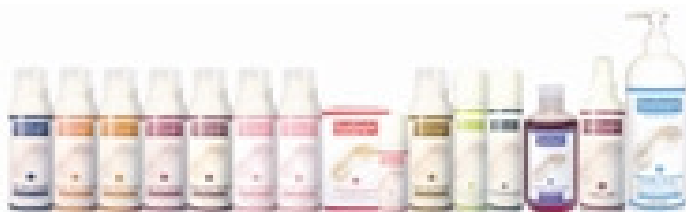

- ⇒ Mosquitos are attracted to smelly feet.
- ⇒ Bromhydrosis (smelly feet) is common to occur with Hyperhydrosis (sweaty feet)
- ⇒ Smelly feet is caused by bacteria on our skin that eats the sweat and excretes waste that has a strong odor
